

## **SDGs LAC Action Scenarios** *LAC implementation progress towards 2030*

The roadmap to achieving the Sustainable Development Goals (SDGs) depends on specific country contexts, planning, and capacities. Implementing the 2030 Agenda opens a chance for nations to develop their institutional models, development plans, data generation mechanisms, and financing schemes.

Cepei created the SDG LAC Action Scenarios to map LAC countries national ecosystems on the progress towards the 2030 Agenda. Artificial Intelligence tools allow Cepei to include the latest available data, capturing any update in scattered data sources in real-time, showing it together in a unique one-stop platform.

### **Why SDGs LAC Action Scenarios?**

To understand a country's investment in, progress towards, and opportunities for its sustainable development, the world needs context. Therefore, we need information about each country's governance, central policies, the characteristics of its international commitments, and data on their social, economic, and environmental realities.

Cepei LAC Action Scenarios offers structured and straightforward access to country information that conditions the national and regional 2030 Agenda implementation. Expert analysis pieces on meeting the SDGs are also available.

### ***¿Did you know...?***

*The 2030 Agenda commitments are universal. However, it requires country-specific implementation approaches "taking into account different national realities, capacities and levels of development and respecting national policies and priorities." (2030 Agenda, paragraph 5).*

## Who Should Use This Tool?

- **Decision-makers** monitoring their countries' progress and implementation towards the SDGs will find complete and organized information and a record of the enabling environment and context in which these processes are taking place.
- **The private sector and civil society** will find relevant information about how to participate in these sustainable development processes and incorporate their contribution to and participation in the SDGs into their practice and business.
- **Research and academia** will benefit from the one-stop, user-friendly platform for Latin America and the Caribbean SDGs related information.

## Other Cepei programs that complement your work around the 2030 Agenda:

**LAC POSITION TRACKER:** The only VNR information repository and lab for monitoring, analyzing, and reporting progress towards meeting the SDGs in LAC. We track every country, every SDG, and every speech at the UN General Debate.

**ANALIZA:** Compiles SDG information from every country in Latin America and the Caribbean and disaggregates data to the indicator level.

## Partnering with SDGs LAC Action Scenarios

### ***Become a partner.***

Share your documents and current information regarding country development plans.

### ***Use the Platform.***

Create knowledge, disseminate the excellent work and, reference SDGs LAC Action Scenarios as a source.

### ***Volunteer with us.***

We welcome practitioners to apply their knowledge and share their talent and creativity to monitor the progress, analyze, and display data in accessible formats with Cepei staff support.

### ***Donate.***

Your support is an investment to ensure the impact on Sustainable Development policies with the best teams, fellows, information, and data.

## Cepei: A Data-driven Think Tank from the Global South

**Cepei** is an independent, non-profit think tank. Established in 2002 and headquartered in Bogota, Colombia, Cepei runs on diversity, free speech, and the creativity of its multidisciplinary team of issue experts and partners worldwide. Based on data and analysis, we empower people and institutions to find pathways towards sustainable development.
